TECHNICAL SKILLS

- Frontend: React, HTML, CSS, JavaScript (ES6+)
- Backend: Java (Spring Boot), Node.js, Express.js
- Architecture: MVC, RESTful APIs
- Database: MongoDB, SQL Server, Oracle
- Tools & DevOps: Git, GitHub, Docker, Postman, VS Code, IntelliJ IDEA

SOFT SKILLS

- Problem Solving
- Code Debugging
- Team Collaboration
- Git Workflow
- Time Management in Agile/Scrum.

LANGUAGES

- English - Intermediate
- English - Good communication

OTHER SKILLS

- Chess
- Badminton

PROFILE

Full-Stack Developer with hands-on experience in building and maintaining web applications using **React**, **Java (Spring Boot)**, and **Node.js**. Skilled in developing both front-end interfaces and back-end services following **MVC architecture** and **RESTful API** design principles. Strong understanding of database systems including **MongoDB**, **SQL Server**, and **Oracle**.

WORK EXPERIENCE

Instagram Clone — React & Node.js

Team size: 4 | Member | Role: Fullstack Developer

- Built key user features such as Edit Profile and Real-time Chat.
- Designed and developed RESTful APIs (users, messages) using Node.js & Express, integrating with MongoDB for data storage.
- Built interactive UI components using **React**, managed app state with **Hooks**, and implemented responsive layouts following **MVC architecture**.
- Implemented user authentication and session handling using **JWT**.
- Collaborated using Git Workflow (feature branches, code reviews, PRs).
 - Tech Stack: React, Node.js, Express.js, MongoDB, JWT, Mongoose

Delivery System

Team size: 1 | Individual Project | Role: Fullstack Developer

- Designed and developed a full-stack web application for managing employees, departments, and clients using **Spring Boot** and **Thymeleaf**.
- Applied **MVC architecture**, **RESTful services**, and SQL Server for structured data management.
- Implemented authentication **JWT**, **CRUD** operations, and role-based access control (Admin, User).
- Learned how to handle form validation, session management, and data persistence using **JPA/Hibernate**.
 - Tech Stack: Spring Boot, Java, HTML, CSS, SQL Server, JWT

Other Notable Works:

Object Detection & Tracking

- Built a real-time object detection and tracking system using **YOLOv8**, **OpenCV**, and **Python**.

🔗 <https://github.com/gnudevz/Processing-Image.git>

Secure Database Management System — C# WinForms & Oracle

- Designed and implemented a role-based access control system with Oracle **VPD** (Virtual Private Database)
- Fine-Grained Access Policies, and data encryption for enterprise-level data security.
